

Queen Zlata the Gentle
Fae Valley
2016

Dear Director, Upp, T.N.A.

I, Queen Zlata the Gentle, greet you!

The fae before you is **Arquinia**. She is the messenger we promised to bring you this missive. We ask that you treat her with care as this is the first time for her to see a world beyond Fae Valley. She will stay with you until a decision is made regarding Ar. You may notice that our Ar resembles your Ar. It hopefully will make both feel more comfortable about the situation you will read about in the attached missive. Treat Arquinia as your own and if you wish, have her go through some of the training that you have your members go through. I feel that this may help us, Fae Valley and T.N.A.

Sincerely,
Queen Zlata the Gentle

Queen Zlata the Gentle

Fae Valley

2016

Dear Director Upp, T.N.A.

I, Queen Zlata the Gentle, greet you!

I wish to discuss with you a matter of great importance that may and will affect the relationship between Fae Valley and T.N.A.

It concerns one of your representatives who comprised the envoy that visited us regarding the aspect of Fae Valley becoming part of a protectorate of T.N.A.

Her name is Arawen or Ar as some have called her. It appears that she has an unusual lineage. One of our Fae has the ability to read a being's lineage, that is their blood line and trace it back to its source.

In this case, Ar's ancestors seem to have originated in Ireland. Our Fae traced Ar's blood back to where we learned that there was a crossing between Fae and human. Ar has at least 60% Fae blood in her. We know that this is unusual because there appears no other crossing since the initial. It is because of this lineage that we must reach an accord.

When she entered Fae Valley, some of our more sensitive Fae noticed an aura that emanated from her. Upon further and subtle investigation, we discovered that she has the ability to tap into the world power; magic as another term. We saw this happen while she was here when she was able to dodge apparent 'mishaps' with no problem or realization that she had done so. One incident comes to mind when a member of the archers misfired an arrow and Ar was able to dodge it. While we understand that the members of T.N.A are trained in offensive and defensive arts, this was more unusual in that she had her back turned to the incoming bolt.

Another example in her abilities was demonstrated when she took a close look at a wilting rose. It restored itself! Some of our Fae reported unusual feelings and visions whenever Ar was nearby.

While not dangerous in itself, the events signal a cusp between our two worlds.

I, we, understand that magic is not that pervasive or recognized in the human world, and in most cases, any event that hints of magic is written off as just being lucky. However, in Fae Valley, we use it all the time as part of our daily life.

Ar presents a dilemma for you and us. Left unchecked, Ar's power could fully manifest itself in a powerful and perhaps dangerous manner not only to her but to those around her.

A solution of sorts is available for Ar and the people at T.N.A; we at Fae Valley have people who nurture and guide Fae as their powers grow. While we understand that Ar has a job to do for T.N.A, we can provide training and guidance to properly channel her magic ability so as to enhance her usefulness for T.N.A and Fae Valley.

The only issue I see that could be a hindrance is the non-acceptance of these facts by Ar and those around her. It is critical that all who know and work with Ar that magic is REAL. Just as your science is real.

Respectfully and with friendship,
Queen Zlata the Gentle
